Testimonial: Cloud Security Alliance & Curated Entertainment

The Cloud Security Alliance hosted its inaugural Chapter Summit event virtually on Thursday, November 4, 2021. This was a half-day, global, virtual event and we wanted to include an activity to make the event fun and interactive and increase participant engagement. After interviewing several different event partner prospects, we selected Curated Entertainment to create a customized engagement activity for our event.

Heather and Velia were a dream to partner with! They were fun to work with and committed to making sure our event was awesome. They dedicated time to understand our event goals and audience as well as learn the functionality of our event platform, Airmeet, to design a fun and interactive Cyberhacker Trivia Challenge for our audience of cybersecurity professionals.

The Cyberhacker Trivia Challenge was an entertaining, fun, interactive and informative session that truly leveled up our event. The activity included comedy, magic, and an interactive trivia game. Participants had a blast competing in the activity and it helped spark conversations and connections between attendees, which was our goal.

We could not be more pleased with the outcome and would not hesitate to recommend Heather and Velia to anyone who is looking to create an interactive and engaging virtual event!

Best,

Brooke Eder, DES
